

Patch Set Update and Critical Patch Update October 2013 Availability Document (Doc ID 1571391.1)

PURPOSE

This document defines the patches and minimum releases for the Database Product Suite, Fusion Middleware Product Suite, Exalogic, and Enterprise Manager Suite Critical Patch Updates and Patch Set Updates released on October 15, 2013.

DETAILS

Patch Set Update and Critical Patch Update October 2013 Availability Document

My Oracle Support Note 1571391.1

Released October 15th, 2013

This document contains the following sections:

- [Section 1, "Overview"](#)
- [Section 2, "What's New in October 2013"](#)
- [Section 3, "Patch Availability for Oracle Products"](#)
- [Section 4, "Final Patch History"](#)
- [Section 5, "Sources of Additional Information"](#)
- [Section 6, "Modification History"](#)
- [Section 7, "Documentation Accessibility"](#)

1 Overview

Oracle provides quarterly Security Patch Updates (SPU) to address security vulnerabilities, and Patch Set Updates (PSU) to address proactive, critical fixes and security vulnerabilities. The security vulnerabilities addressed are announced in the Advisory for October 2013, available at:

<http://www.oracle.com/technetwork/topics/security/cpuoct2013-1899837.html>

This document lists the Oracle Database, Fusion Middleware and Enterprise Manager SPU and PSU patches for product releases under error correction. The October 2013 release supersedes earlier Critical Patch Updates and Patch Set Updates for the same product releases. This document is subject to continual update after the initial release, and the changes are listed in [Section 6, "Modification History."](#) If you print this document, check My Oracle Support to ensure you have the latest version.

This section contains the following:

- [Section 1.1, "How To Use This Document"](#)
- [Section 1.2, "Terminology in the Tables"](#)
- [Section 1.3, "On-Request Patches"](#)
- [Section 1.4, "CPU Program and My Oracle Support Patch Recommendations"](#)

- [Section 1.5, "Oracle Database Security Patch Updates and Patch Set Updates"](#)

1.1 How To Use This Document

The following steps explain how to use this document.

Step 1 Assess your Environments

Determine the Oracle product suites and products and their release numbers for each of your environments.

Step 2 Read Important Announcements

Review [Section 2, "What's New in October 2013,"](#) as it lists documentation and packaging changes along with important announcements such as upcoming final patches.

Step 3 Determine Patches to be Applied

For each environment, determine which patches need to be applied by using the tables in [Section 3, "Patch Availability for Oracle Products."](#) There is one availability table for each product suite release, such as Oracle Database 11.1.0.7, Oracle Fusion Middleware 11.1.1.5.0, and Enterprise Manager Grid Control 10.2.0.5

- The table lists the patches to be applied either to the product or to the appropriate product Oracle homes that are associated with the product suite
- The patches are listed in the order released, with newest patches listed first
- For some patches, multiple Oracle homes are listed. Apply the patch to all of the homes indicated that are applicable to your environment and only to the listed Oracle homes
- The table lists only product releases that are under Premier Support or Extended Support and are under error correction as defined in My Oracle Support [Note 209768.1](#), Database, FMW, EM Grid Control, and OCS Software Error Correction Support Policy. Patches are provided only for these releases. If you do not see the release that you have installed, then check [Table 143, "Final Patch History"](#) and contact Oracle Support for further assistance
- Patches that include security vulnerabilities announced in the current quarter's CPU Advisory, list the vulnerability CVE numbers in the Advisory Number column. If you are interested in the risk matrix for the vulnerabilities fixed in the patch, then see the CPU Advisory at <http://www.oracle.com/technetwork/topics/security/alerts-086861.html>. For patches that are listed from previous quarterly releases, or the current one without any security fixes, the column indicates "Released MMM YYYY"
- When a section is referenced in a table, follow the link to determine which patches to install. For example, when [Section 3.1.4, "Oracle Database"](#) is referenced, determine the Oracle Database release that is installed, and find the patches to apply in the table for that Oracle Database release in [Section 3.1.4, "Oracle Database."](#)

Step 4 Apply the Patches

Download the patches, review the READMEs, and apply the patches according to the instructions.

Step 5 Planning for Future Critical Patch Updates

To help you plan for future Critical Patch Updates, this document includes final patch information based on Oracle's Lifetime Support Policy and error correction policies.

[Section 2.2, "Final Patch Information \(Error Correction Policies\)"](#) in [Section 2, "What's New in October 2013,"](#) documents product releases for which final Critical Patch Updates are upcoming or are being announced. In each product section, there is also an Error Correction Information Table that documents the final CPU patch for the product. Products that have reached the end of error correction are documented in [Section 4, "Final Patch History."](#)

1.2 Terminology in the Tables

The following terminology is used in this patch availability document and in the subsequent tables.

- BP Bundle Patch. An iterative, cumulative patch that is issued between patch sets. Bundle patches usually include only fixes, but some products may include minor enhancements.

- CPU Critical Patch Update patch. Prior to October 2012, Security Patch Update (SPU) patches were called Critical Patch Update (CPU) patches. For patches that were previously released as CPU patches, this Patch Availability Document will continue to reference them as CPUs.
- NA Not Applicable.
- OR On-Request. The patch is made available through the On-Request program.
- PSU Patch Set Update. An iterative, cumulative patch that contains both security fixes and non-security critical fixes that are high-value and low-risk.
- SPU Security Patch Update. An iterative, cumulative patch consisting of security fixes. Formerly known as a Critical Patch Update. Note that Oracle's program for quarterly release of security fixes continues to be called the Critical Patch Update. Patches released as part of this program may be Patch Set Updates, Security Patch Updates, and Bundle Patches. Regardless of the patch type, the patches are cumulative.

1.3 On-Request Patches

Oracle does not release proactive patches for historically inactive releases. However, Oracle will deliver these patches when requested.

The following guidelines describe how to initiate an on-request (OR) patch.

A request may be made:

- At any time. However, a patch for a specific quarterly release, such as CPUOct2012, cannot be requested. Depending on when the request is received and processed, either the patch for the current quarterly release or the next quarterly release will be provided. Your Service Request (SR) will provide you the planned availability date for the patch.
- As long as the version is in either Premier Support or Extended Support. Once the final patch for the version has been released, an OR can be requested for up to 2 weeks after the release date. For example, if a product release is under Extended Support through the release of CPUJan2013 on January 15, 2013, then you can file a request for the product release through January 29, 2013.
- For a platform-version combination when a major release or patch set is released on a platform after a quarterly release date. Oracle will provide the next patch for that platform-version combination, however you may request the current patch by following the on-request process. For example, if a patch is released for a platform on August 1, 2012, Oracle will provide the CPUOct2012 patch for that platform. You may request a CPUJul2012 patch for the platform, and Oracle will review the request and determine whether to provide CPUJul2012 or CPUOct2012.

A patch that is marked as on-request (OR) may already have been requested by another customer and be available on My Oracle Support. Before you file a Service Request (SR), check on My Oracle Support to see if the patch is already available for your platform.

1.4 CPU Program and My Oracle Support Patch Recommendations

My Oracle Support patch recommendation features are available on the Patches & Update tab. The patches announced in this document as part of the CPU program are classified as "Security" patch recommendations in My Oracle Support. If a new patch is being announced in this document, then the classification on any earlier patch is changed to "General", causing it to be removed from the My Oracle Support patch recommendations. If a patch has a "Security" classification, and a subsequent bundle, SPU, or PSU is released with a recommendation classification, then it will be classified as a "Security" recommendation in My Oracle Support.

Once a product release is no longer in error correction, its CPU patch information is removed from this document, but the last patch recommendation continues to be available in My Oracle Support.

1.5 Oracle Database Security Patch Updates and Patch Set Updates

The Database Security Patch Updates and Patch Set Updates that are released each quarter contain the same security fixes. However, they use different patching mechanisms, and Patch Set Updates include both security and recommended bug fixes. Consider the following guidelines when you are deciding to apply Patch Set Updates instead of Security Patch Updates:

- Security Patch Updates are applied only on the base release version, for example 10.2.0.4.0

- Patch Set Updates can be applied on the base release version or on any earlier Patch Set Update. For example, 11.1.0.7.2 can be applied on 11.1.0.7.1 and 11.1.0.7.0
- Once a Patch Set Update has been applied, the recommended way to obtain future security content is to apply subsequent Patch Set Updates. Reverting from an applied Patch Set Update to the Security Patch Update, while technically possible, requires significant time and effort, and therefore, is not advised. You would need to determine which individual, non-security patches that are included in the Patch Set Update are pertinent to your deployment, and then apply them after installing the Security Patch Update.
- Applying a Security Patch Update on an installation with an installed Patch Set Update is not supported

For more information on Patch Set Updates, see My Oracle Support [Note 854428.1](#), Patch Set Updates (PSUs) for Oracle Products.

2 What's New in October 2013

This section describes important changes in October 2013:

- [Section 2.1, "Database Security Patching from 12.1.0.1 Onwards"](#)
- [Section 2.2, "Final Patch Information \(Error Correction Policies\)"](#)
- [Section 2.3, "New Minimum Product Requirements for CPUOct2013"](#)
- [Section 2.4, "New OPatch Requirements"](#)
- [Section 2.5, "Post Release CPU and PSU Patches"](#)

2.1 Database Security Patching from 12.1.0.1 Onwards

Starting with Oracle Database version 12.1.0.1, Oracle only provides Patch Set Updates (PSU) to meet the Critical Patch Update (CPU) program requirements for security patching. Security Patch Updates (SPU) will no longer be available. Oracle has moved to this simplified model due to popular demand. The PSU is Oracle's preferred proactive patching mechanism since 2009.

For more information, see My Oracle Support [Note 1581950.1](#), Database Security Patching from 12.1.0.1 onwards.

2.2 Final Patch Information (Error Correction Policies)

The Final patch is the last CPU or PSU release for which the product release is under error correction. Final patches for upcoming releases, as well as newly scheduled final patches, are listed in the following sections.

Final patches scheduled for January 2014:

- Oracle Data Integrator 11.1.1.6.0
- Oracle Directory Server Enterprise Edition 11.1.1.5.0
- Oracle Fusion Middleware 11.1.1.6.0
- Oracle Web Cache 11.1.1.6.0
- Oracle WebCenter Portal 11.1.1.6

Final patches scheduled for October 2013:

- Oracle Access Manager 10.1.4.0
- Oracle Database 11.2.0.2
- Oracle Directory Server Enterprise Edition 6.3.1
- Oracle Identity Manager 9.1.0.2
- Oracle Real user Experience Insight 6.0.x
- Oracle WebCenter Sites 11.1.1.6.0

- Sun Java System Directory Server Enterprise Edition 6.3.1
- WebLogic Communications Server 3.x
- WebLogic Integration 9.2.3.0
- WebLogic Portal 9.2.3.0
- WebLogic Server 9.2.4.0
- WebLogic SIP Server 3.x
- WebLogic Workshop 9.2.3.0

For additional final patch history information, see [Table 143](#). For information on the error correction support policy for patches, refer to My Oracle Support [Note 209768.1](#), Database, FMW, EM Grid Control, and OCS Software Error Correction Support Policy.

2.3 New Minimum Product Requirements for CPUOct2013

The following is new for CPUOct2013:

- The new minimum version for Oracle Database Appliance is 2.8.0.0.0

2.4 New OPatch Requirements

There is one new minimum OPatch requirement for October 2013:

- OPatch 12.1.0.1.1 for Database PSU 12.1.0.1.1
- OPatch 12.1.0.1.2 for GI PSU 12.1.0.1.1

2.5 Post Release CPU and PSU Patches

The following are post-release patches with their estimated release dates.

- Microsoft Windows (32-Bit) BP25 for Database 11.2.0.3
Available October 18, 2013

3 Patch Availability for Oracle Products

This section contains the following:

- [Section 3.1, "Oracle Database"](#)
- [Section 3.2, "Oracle Enterprise Manager"](#)
- [Section 3.3, "Oracle Fusion Middleware"](#)
- [Section 3.4, "Oracle Sun Middleware"](#)
- [Section 3.5, "Tools"](#)

3.1 Oracle Database

This section contains the following:

- [Section 3.1.1, "Oracle APEX Listener"](#)
- [Section 3.1.2, "Oracle Application Express"](#)
- [Section 3.1.3, "Oracle Audit Vault"](#)
- [Section 3.1.4, "Oracle Database"](#)
- [Section 3.1.5, "Oracle Database Appliance"](#)

- [Section 3.1.6, "Oracle Database Mobile/Lite Server"](#)
- [Section 3.1.7, "Oracle GoldenGate Veridata."](#)
- [Section 3.1.8, "Oracle Secure Backup"](#)
- [Section 3.1.9, "Oracle Secure Enterprise Search"](#)
- [Section 3.1.10, "Oracle TimesTen"](#)

3.1.1 Oracle APEX Listener

[Table 1](#) describes the Error Correction information for Oracle APEX Listener 1.1.4.

Agent home	CPU Patch 13894921 and CPU Patch 13705483	Released April 2012	Standalone OC4J 10.1.3.4 Patch Set (Special OPatch needed, see README) OC4J 10.1.3.4 one-off patch (Special OPatch needed, see README)
Server home	CPU Patch 13705483	Released April 2012	OC4J 10.1.3.4 one-off patch (Special OPatch needed, see README)

3.1.4 Oracle Database

This section contains the following:

- [Section 3.1.4.1, "Patch Availability for Oracle Database"](#)
- [Section 3.1.4.2, "Oracle Database 12.1.0.1"](#)
- [Section 3.1.4.3, "Oracle Database 11.2.0.3"](#)
- [Section 3.1.4.4, "Oracle Database 11.2.0.2"](#)
- [Section 3.1.4.5, "Oracle Database 11.1.0.7"](#)

3.1.4.1 Patch Availability for Oracle Database

For Oracle Database 10.2.0.4 and later releases, customers have the option to install the Security Patch Update (SPU) or the Patch Set Update (PSU). Both patch types are cumulative patches. The PSU includes the security vulnerability bug fixes, as well as additional non-security bug fixes recommended by Oracle. For more information on PSU patches, see My Oracle Support [Note 854428.1](#), Patch Set Updates (PSUs) for Oracle Products.

For the Microsoft Windows platforms, Oracle Database patches are released as cumulative patch bundles. You may install the indicated patch or [later](#) bundle in the Database Windows bundle series. The Windows patch bundles include the security vulnerability bug fixes, the PSU recommended non-security bug fixes, and other customer-requested bug fixes.

3.1.4.2 Oracle Database 12.1.0.1

11.1.1.6.0	BP Patch 14630670	Released October 2012	BIP patch
10.1.3.4.2	BP Patch 14625193	Released October 2012	See My Oracle Support Note 797057.1 , Overview of Available Update Patches for Oracle BI Publisher Enterprise 10g

3.3.6 Oracle Business Process Management

Follow the special instructions below to download Oracle Business Process Management patches.

1. Click Patches & Updates after logging into My Oracle Support.
2. Search for Oracle Business Process Management Suite.
3. Search for the required BPM release by clicking Select up to 10.
4. Select the patch with the build number that is indicated in [Table 52](#), or the patch with higher build number than what is indicated for the platform you are about to update, for example: EnterpriseJ2EE, Studio, or EnterpriseSA.
5. Download the patch.

[Table 51](#) describes the Error Correction information for Oracle Business Process Management.

Table 51 Error Correction information for Oracle Business Process Management

Patch Information	10.3.2	10.3.1	6.0.5	Comments
Final Patch	-	-	July 2014	

[Table 52](#) describes the available patches for Oracle Business Process Management.

Oracle Endeca Server 7.4 home	SPU Patch 16822423	Released July 2013	

3.3.12 Oracle Exalogic Patch Set Update (PSU)

[Table 64](#) describes the Error Correction information for Exalogic Patch Set Update (PSU).

Table 64 Error Correction information for Oracle Exalogic Patch Set Update (PSU)

Patch Information	2.x	1.x	Comments
Final Patch	-	-	

[Table 65](#) describes the available patches for Oracle Exalogic.

Table 65 Patch Set Update Availability for Oracle Exalogic

Oracle Exalogic	Patch	Advisory Number	Comments
2.x Physical	2.0.3.0.4 Physical Linux x86-64 and 2.0.4.0.4 Physical Solaris x86-64 PSU Patch 17201685	Released October 2013	See Note 1314535.1 , Announcing Exalogic PSUs (Patch Set Updates) Oracle Exalogic 2.x Virtual PSU is available for Linux x86-64 and Solaris x86-64 platforms for Exalogic X2-2 and X3-2 systems running EECS 2.0 in a physical configuration
2.x Virtual	Exalogic Infrastructure 2.0.4.0.2 PSU Patch 16103584	Released April 2013	See Note 1314535.1 , Announcing Exalogic PSUs (Patch Set Updates) Oracle Exalogic 2.x Virtual PSU is available only for Linux x86-64 platforms

Oracle Exalogic	Patch	Advisory Number	Comments
1.x	Exalogic Infrastructure 1.0.0.2.6 PSU Patch 14834860	Released October 2012	See Note 1314535.1 , Announcing Exalogic PSUs (Patch Set Updates) Oracle Exalogic 1.x PSU is available only for Oracle Solaris x86-64 platforms

3.3.13 Oracle Forms and Reports 11g Release 2

For the appropriate product versions listed below, refer to the corresponding Oracle Fusion Middleware patch availability sections that contain information on Error Correction, and for the patches to apply. Not all homes that are listed in those sections might be present in the Oracle Forms and Reports 11g Release 2 installation. Only the relevant homes from those tables need to be patched.

[Table 66](#) describes the available patches for Oracle Forms and Reports 11g Release 2.

Table 66 Patch Availability for Oracle Forms and Reports 11g Release 2

Product Home	Patches	Comments
Oracle Forms and Reports 11.1.2.1 home	See Section 3.3.14.2, "Oracle Forms and Reports 11.1.2.1"	
Oracle Forms and Reports 11.1.2.0 home	See Section 3.3.14.5, "Oracle Identity Access Management 11.1.2.0"
