

Patch Set Update and Critical Patch Update October 2014 Availability Document (Doc ID 1912224.1)

PURPOSE

This document defines the patches and minimum releases for the Database Product Suite, Fusion Middleware Product Suite, Exalogic, and Enterprise Manager Suite Critical Patch Updates and Patch Set Updates released on October 14, 2014.

DETAILS

Patch Set Update and Critical Patch Update October 2014 Availability Document

My Oracle Support Note 1912224.1

Released October 14th, 2014

This document contains the following sections:

- [Section 1, "Overview"](#)
- [Section 2, "What's New in October 2014"](#)
- [Section 3, "Patch Availability for Oracle Products"](#)
- [Section 4, "Final Patch History"](#)
- [Section 5, "Sources of Additional Information"](#)
- [Section 6, "Modification History"](#)
- [Section 7, "Documentation Accessibility"](#)

1 Overview

Oracle provides quarterly Security Patch Updates (SPU) to address security vulnerabilities, and Patch Set Updates (PSU) to address proactive, critical fixes and security vulnerabilities. The security vulnerabilities addressed are announced in the Advisory for October 2014, available at:

<http://www.oracle.com/technetwork/topics/security/cpuoct2014-1972960.html>

This document lists the Oracle Database, Fusion Middleware and Enterprise Manager SPU and PSU patches for product releases under error correction. The October 2014 release supersedes earlier Critical Patch Updates and Patch Set Updates for the same product releases. This document is subject to continual update after the initial release, and the changes are listed in [Section 6, "Modification History."](#) If you print this document, check My Oracle Support to ensure you have the latest version.

This section contains the following:

- [Section 1.1, "How To Use This Document"](#)
- [Section 1.2, "Terminology in the Tables"](#)
- [Section 1.3, "On-Request Patches"](#)
- [Section 1.4, "CPU Program and My Oracle Support Patch Recommendations"](#)

- [Section 1.5, "Oracle Database Security Patch Updates and Patch Set Updates"](#)

1.1 How To Use This Document

The following steps explain how to use this document.

Step 1 Assess your Environments

Determine the Oracle product suites and products and their release numbers for each of your environments.

Step 2 Read Important Announcements

Review [Section 2, "What's New in October 2014,"](#) as it lists documentation and packaging changes along with important announcements such as upcoming final patches.

Step 3 Determine Patches to be Applied

For each environment, determine which patches need to be applied by using the tables in [Section 3, "Patch Availability for Oracle Products."](#) There is one availability table for each product suite release, such as Oracle Database 11.1.0.7, Oracle Fusion Middleware 11.1.1.5.0, and Enterprise Manager Grid Control 10.2.0.5

- The table lists the patches to be applied either to the product or to the appropriate product Oracle homes that are associated with the product suite
- The patches are listed in the order released, with newest patches listed first
- For some patches, multiple Oracle homes are listed. Apply the patch to all of the homes indicated that are applicable to your environment and only to the listed Oracle homes
- The table lists only product releases that are under Premier Support or Extended Support and are under error correction as defined in My Oracle Support [Note 209768.1](#), Database, FMW, EM Grid Control, and OCS Software Error Correction Support Policy. Patches are provided only for these releases. If you do not see the release that you have installed, then check [Table 168, "Final Patch History"](#) and contact Oracle Support for further assistance
- Patches that include security vulnerabilities announced in the current quarter's CPU Advisory, list the vulnerability CVE numbers in the Advisory Number column. If you are interested in the risk matrix for the vulnerabilities fixed in the patch, then see the CPU Advisory at <http://www.oracle.com/technetwork/topics/security/alerts-086861.html>. For patches that are listed from previous quarterly releases, or the current one without any security fixes, the column indicates "Released MMM YYYY"
- When a section is referenced in a table, follow the link to determine which patches to install. For example, when [Section 3.1.4, "Oracle Database"](#) is referenced, determine the Oracle Database release that is installed, and find the patches to apply in the table for that Oracle Database release in [Section 3.1.4, "Oracle Database."](#)

Step 4 Apply the Patches

Download the patches, review the READMEs, and apply the patches according to the instructions.

Step 5 Planning for Future Critical Patch Updates

To help you plan for future Critical Patch Updates, this document includes final patch information based on Oracle's Lifetime Support Policy and error correction policies.

[Section 2.5, "Final Patch Information \(Error Correction Policies\)"](#) in [Section 2, "What's New in October 2014,"](#) documents product releases for which final Critical Patch Updates are upcoming or are being announced. In each product section, there is also an Error Correction Information Table that documents the final CPU patch for the product. Products that have reached the end of error correction are documented in [Section 4, "Final Patch History."](#)

1.2 Terminology in the Tables

The following terminology is used in this patch availability document and in the subsequent tables.

- BP Bundle Patch. An iterative, cumulative patch that is issued between patch sets. Bundle patches usually include only fixes, but some products may include minor enhancements.

- CPU Critical Patch Update patch. Prior to October 2012, Security Patch Update (SPU) patches were called Critical Patch Update (CPU) patches. For patches that were previously released as CPU patches, this Patch Availability Document will continue to reference them as CPUs.
- Final Patch is the last quarterly cycle until when patches will be provided as per the Premier Support or Extended Support policies. For more information, see [Oracle Lifetime Support Policies](http://www.oracle.com/us/support/lifetime-support/index.html) at <http://www.oracle.com/us/support/lifetime-support/index.html>.
- NA Not Applicable.
- OR On-Request. The patch is made available through the On-Request program.
- PSU Patch Set Update. An iterative, cumulative patch that contains both security fixes and non-security critical fixes that are high-value and low-risk.
- SPU Security Patch Update. An iterative, cumulative patch consisting of security fixes. Formerly known as a Critical Patch Update. Note that Oracle's program for quarterly release of security fixes continues to be called the Critical Patch Update. Patches released as part of this program may be Patch Set Updates, Security Patch Updates, and Bundle Patches. Regardless of the patch type, the patches are cumulative.
- Overlay SPU patch provided as an overlay on top of a PSU or BP instead of a base/patch set release.

1.3 On-Request Patches

Oracle does not release proactive patches for historically inactive platforms. However, Oracle will deliver these patches when requested.

The following guidelines describe how to initiate an on-request (OR) patch.

A request may be made:

- At any time. However, a patch for a specific quarterly release, such as CPUOct2012, cannot be requested. Depending on when the request is received and processed, either the patch for the current quarterly release or the next quarterly release will be provided. Your Service Request (SR) will provide you the planned availability date for the patch.
- As long as the version is in either Premier Support or Extended Support and error correction support has not expired. For example, if a product release is under Extended Support through the release of CPUJan2013 on January 15, 2013, then you can file a request for the product release through January 29, 2013. For more information, see [Oracle Lifetime Support Policies](http://www.oracle.com/us/support/lifetime-support/index.html) at <http://www.oracle.com/us/support/lifetime-support/index.html>, and [Note 209768.1](#), Database, FMW, EM Grid Control, and OCS Software Error Correction Support Policy.
- For a platform-version combination when a major release or patch set is released on a platform after a quarterly release date. Oracle will provide the next patch for that platform-version combination, however you may request the current patch by following the on-request process. For example, if a patch is released for a platform on August 1, 2012, Oracle will provide the CPUOct2012 patch for that platform. You may request a CPUJul2012 patch for the platform, and Oracle will review the request and determine whether to provide CPUJul2012 or CPUOct2012.

A patch that is marked as on-request (OR) may already have been requested by another customer and be available on My Oracle Support. Before you file a Service Request (SR), check on My Oracle Support to see if the patch is already available for your platform.

1.4 CPU Program and My Oracle Support Patch Recommendations

My Oracle Support patch recommendation features are available on the Patches & Update tab. The patches announced in this document as part of the CPU program are classified as "Security" patch recommendations in My Oracle Support. If a new patch is being announced in this document, then the classification on any earlier patch is changed to "General", causing it to be removed from the My Oracle Support patch recommendations. If a patch has a "Security" classification, and a subsequent bundle, SPU, or PSU is released with a recommendation classification, then it will be classified as a "Security" recommendation in My Oracle Support.

Once a product release is no longer in error correction, its CPU patch information is removed from this document, but the last patch recommendation continues to be available in My Oracle Support.

1.5 Oracle Database Security Patch Updates and Patch Set Updates

The Database Security Patch Updates and Patch Set Updates that are released each quarter contain the same security fixes. However, they use different patching mechanisms, and Patch Set Updates include both security and recommended bug fixes. Consider the following guidelines when you are deciding to apply Patch Set Updates instead of Security Patch Updates:

- Security Patch Updates are applied only on the base release version, for example 10.2.0.4.0
- Patch Set Updates can be applied on the base release version or on any earlier Patch Set Update. For example, 11.1.0.7.2 can be applied on 11.1.0.7.1 and 11.1.0.7.0
- Once a Patch Set Update has been applied, the recommended way to obtain future security content is to apply subsequent Patch Set Updates. Reverting from an applied Patch Set Update to the Security Patch Update, while technically possible, requires significant time and effort, and therefore, is not advised. You would need to determine which individual, non-security patches that are included in the Patch Set Update are pertinent to your deployment, and then apply them after installing the Security Patch Update.
- Applying a Security Patch Update on an installation with an installed Patch Set Update is not supported

For more information on Patch Set Updates, see My Oracle Support [Note 854428.1](#), Patch Set Updates (PSUs) for Oracle Products.

2 What's New in October 2014

This section describes important changes in October 2014:

- [Section 2.1, "Database Patch for Engineered Systems and Database In-memory 12.1.0.2.x"](#)
- [Section 2.2, "Oracle JavaVM Component Database PSU"](#)
- [Section 2.3, "Changes in Cloud Application Foundation Components"](#)
- [Section 2.4, "My Oracle Support \(MOS\) Conflict Checker Tool"](#)
- [Section 2.5, "Final Patch Information \(Error Correction Policies\)"](#)
- [Section 2.6, "New Minimum Product Requirements for CPUOct2014"](#)
- [Section 2.7, "New OPatch Requirements"](#)
- [Section 2.8, "Post Release Patches"](#)

2.1 Database Patch for Engineered Systems and Database In-memory 12.1.0.2.x

Beginning October 2014, Oracle announces a new bundle patch option for Database 12.1.0.2. The Database Patch for Engineered Systems and Database In-memory provides critical bug fixes for Exadata and Database with the In-memory option. The patch also includes all CPU security fixes and the Database PSU 12.1.0.2.1 bug fixes.

2.2 Oracle JavaVM Component Database PSU

In CPUOct2014 and later, Oracle JavaVM Component Database PSU is a new Patch Set Update for Database versions 11.1.0.7, 11.2.0.3, 11.2.0.4, 12.1.0.1 and 12.1.0.2. This PSU addresses Oracle JavaVM CPU program security vulnerabilities.

For RAC deployments, the Oracle JavaVM Component Database PSU patches cannot be installed in a RAC Rolling manner and requires database downtime to install. For the CPUOct2014 patches, there is an option that provides an interim solution to protect against all currently known Oracle JavaVM security vulnerabilities until such downtime is available to install these patches. For more information, see My Oracle Support [Note 1929745.1](#), Oracle Recommended Patches -- Oracle JavaVM Component Database PSU (OJVM PSU) Patches.

The OJVM PSU also addresses JDBC security vulnerabilities CVE-2014-4289 and CVE-2014-6544 as a separate generic patch (not platform-specific) that can be applied to all Oracle Database homes, including Client Only and Instant Client homes for Database Releases 12.1.0.1, 11.2.0.4, 11.2.0.3 and 11.1.0.7. Patch numbers are listed below in their Respective tables.

2.3 Changes in Cloud Application Foundation Components

Beginning in October 2014 the Cloud Application Foundation (CAF) components (Java SE, JRockit, WLS, Coherence and Oracle Traffic Director) will no longer be included as a part of the Exalogic PSU.

2.4 My Oracle Support (MOS) Conflict Checker Tool

The My Oracle Support (MOS) Conflict Checker tool is available as of July 21, 2014.

This tool is accessible from the Patch Search results screen ("Analyze with OPatch" button). The MOS Conflict Checker Tool allows you to upload an OPatch inventory to check for conflicts with patches to apply to your environment. If no conflicts are found, you can download the patches. If conflicts are found, the tool finds an existing resolution to download. If no resolution is found, you can request a solution, and monitor your request in the Plans region.

For more information and a demonstration video, see Knowledge Document [Note 1091294.1](#), How to use the My Oracle Support Conflict Checker Tool.

2.5 Final Patch Information (Error Correction Policies)

The Final patch is the last CPU or PSU release for which the product release is under error correction. Final patches for upcoming releases, as well as newly scheduled final patches, are listed in the following sections.

Final patches scheduled for January 2015:

- JRockit 5.x
- Oracle Identity and Access Management 11.1.2.1
- WebLogic Integration 10.0.1.0
- WebLogic Portal 10.2.1.0
- WebLogic Portal 10.0.1.0
- WebLogic Server 10.0.2.0
- WebLogic Workshop 10.2.1.0
- WebLogic Workshop 10.0.1.0

Final patches scheduled for October 2014:

- Oracle Database Management Plug-in 12.1.0.4
- Oracle Enterprise Manager Grid Control 10.2.0.5
- Oracle WebGate 10.1.4.3.0

For additional final patch history information, see [Table 168](#). For information on the error correction support policy for patches, refer to My Oracle Support [Note 209768.1](#), Database, FMW, EM Grid Control, and OCS Software Error Correction Support Policy.

2.6 New Minimum Product Requirements for CPUOct2014

The following is new for CPUOct2014:

- Minimum version for Oracle Application Express is 4.2.6

2.7 New OPatch Requirements

Opatch 12.1.0.1.5 is the minimum version for Grid Infrastructure PSU 12.1.0.2.1 and Database Patch for Engineered Systems and DB In-Memory 12.1.0.2.1.

2.8 Post Release Patches

The following are post-release patches with their estimated release dates.

- GI 12.1.0.2.1 PSU [Patch 19392646](#)

Available October 17, 2014

- Database patch for Engineered Systems and Database In-memory 12.1.0.2.1 [Patch 19404326](#)
Available October 17, 2014
- Quarterly Full Stack download for Exadata (Oct2014) 12.1.0.2 BP [Patch 19625684](#)
Available October 17, 2014
- Combo OJVM PSU 12.1.0.2.1 and GI PSU 12.1.0.2.1 [Patch 19791375](#)
Available October 21, 2014
- Combo OJVM PSU 12.1.0.2.1 and Database BP 12.1.0.2.1 [Patch 19791399](#)
Available October 21, 2014
- Microsoft Windows 32-Bit and x86-64 12.1.0.1 BP 14 [Patch 19542943](#)
Available October 16, 2014
- Oracle JavaVM Component 12.1.0.1.1 Database PSU [Patch 19801531](#) for Windows x64 (64-bit)
Available November 5, 2014
- Oracle JavaVM Component 12.1.0.1.1 Database PSU [Patch 19801531](#) for Windows (32-bit) is available (see [Table 10](#)). This Windows (32-bit) Patch is not required.
- Oracle JavaVM Component 12.1.0.1.1 Database PSU [Patch 19282024](#) for HP-IA
Available October 22, 2014
- Oracle JavaVM Component 11.2.0.3.1 Database PSU [Patch 19806120](#) for Windows x64 (64-bit)
Available October 31, 2014
- Oracle JavaVM Component 11.2.0.3.1 Database PSU [Patch 19806120](#) for Windows (32-bit)
Available November 11, 2014
- Oracle JavaVM Component 11.1.0.7.1 Database PSU [Patch 19806118](#) for Windows (32-bit)
Available November 11, 2014
- Oracle JavaVM Component 11.1.0.7.1 Database PSU [Patch 19806118](#) for Windows x64 (64-bit)
Estimated December 1, 2014

3 Patch Availability for Oracle Products

This section contains the following:

- [Section 3.1, "Oracle Database"](#)
- [Section 3.2, "Oracle Enterprise Manager"](#)
- [Section 3.3, "Oracle Fusion Middleware"](#)
- [Section 3.4, "Oracle Sun Middleware"](#)
- [Section 3.5, "Tools"](#)

3.1 Oracle Database

This section contains the following:

- [Section 3.1.1, "Oracle APEX Listener"](#)
- [Section 3.1.2, "Oracle Application Express"](#)
- [Section 3.1.3, "Oracle Audit Vault"](#)

- [Section 3.1.4, "Oracle Database"](#)
- [Section 3.1.5, "Oracle Database Appliance"](#)
- [Section 3.1.6, "Oracle Database Mobile/Lite Server"](#)
- [Section 3.1.7, "Oracle GoldenGate Veridata"](#)
- [Section 3.1.8, "Oracle Secure Backup"](#)
- [Section 3.1.9, "Oracle Secure Enterprise Search"](#)
- [Section 3.1.10, "Oracle TimesTen"](#)

3.1.1 Oracle APEX Listener

[Table 1](#) describes the Error Correction information for Oracle APEX Listener 1.1.4.

Table 1 Error Correction information for Oracle APEX Listener 1.1.4

Patch Information	1.1.4	Comments
Final Patch	-	

[Table 2](#) describes the minimum product requirements for Oracle APEX Listener. Critical Patch Update security vulnerabilities are fixed in the listed releases. For Oracle APEX Listener downloads and installation instructions, see <http://www.oracle.com/technetwork/developer-tools/apex-listener/downloads/index.html>.

Table 2 Minimum Product Requirements for Oracle APEX Listener

Component	Release	Advisory Number	Comments
Oracle APEX Listener	1.1.4	Released July 2012	

3.1.2 Oracle Application Express

[Table 3](#) describes the Error Correction information for Oracle Application Express.

Table 3 Error Correction information for Oracle Application Express

Patch Information	4.2	Comments
Final Patch	October 2017	

[Table 4](#) describes the minimum product requirements for Oracle Application Express. Critical Patch Update security vulnerabilities are fixed in the listed releases. For Oracle Application Express downloads and installation instructions, see <http://www.oracle.com/technetwork/developer-tools/apex/downloads/index.html>.

Table 4 Minimum Product Requirements for Oracle Application Express

Component	Release	Advisory Number	Comments
Oracle Application Express	4.2.6	CVE-2014-6483, CVE-2014-0050	

3.1.3 Oracle Audit Vault

[Table 5](#) describes the Error Correction information for Oracle Audit Vault.

Table 5 Error Correction information for Oracle Audit Vault

Patch Information	10.3	Comments
Final Patch	October 2016	

[Table 6](#) describes the available patches for Oracle Audit Vault 10.3.0.0.

Table 6 Patch Availability for Oracle Audit Vault 10.3.0.0

Product Home	Patch	Advisory Number	Comments
Oracle Audit Vault Embedded Database 11.2.0.3 for Server and Agent home	See Section 3.1.4.5, "Oracle Database 11.2.0.3"	See Section 3.1.4.5, "Oracle Database 11.2.0.3"	
Agent home	CPU Patch 13894921 and CPU Patch 13705483	Released April 2012	Standalone OC4J 10.1.3.4 Patch Set (Special OPatch needed, see README) OC4J 10.1.3.4 one-off patch (Special OPatch needed, see README)
Server home	CPU Patch 13705483	Released April 2012	OC4J 10.1.3.4 one-off patch (Special OPatch needed, see README)

3.1.4 Oracle Database

This section contains the following:

- [Section 3.1.4.1, "Patch Availability for Oracle Database"](#)
- [Section 3.1.4.2, "Oracle Database 12.1.0.2"](#)
- [Section 3.1.4.3, "Oracle Database 12.1.0.1"](#)
- [Section 3.1.4.4, "Oracle Database 11.2.0.4"](#)
- [Section 3.1.4.5, "Oracle Database 11.2.0.3"](#)
- [Section 3.1.4.6, "Oracle Database 11.1.0.7"](#)

3.1.4.1 Patch Availability for Oracle Database

For Oracle Database 10.2.0.4 and later releases, customers have the option to install the Security Patch Update (SPU) or the Patch Set Update (PSU). Both patch types are cumulative patches. The PSU includes the security vulnerability bug fixes, as well as additional non-security bug fixes recommended by Oracle. For more information on PSU patches, see My Oracle Support [Note 854428.1](#), Patch Set Updates (PSUs) for Oracle Products.

For the Microsoft Windows platforms, Oracle Database patches are released as cumulative patch bundles. You may install the indicated patch or [later](#) bundle in the Database Windows bundle series. The Windows patch bundles include the security vulnerability bug fixes, the PSU recommended non-security bug fixes, and other customer-requested bug fixes.

3.1.4.2 Oracle Database 12.1.0.2

[Table 7](#) describes the Error Correction information for Oracle Database 12.1.0.2.

Table 7 Error Correction information for Oracle Database 12.1.0.2

Patch Information	12.1.0.2	Comments
Final Patch	-	
PSU On-Request platforms		

[Table 8](#) describes all combinations of patches that are available for Oracle Database 12.1.0.2.

If the Combo patches that are listed in the first row are applied, then the patches listed in Rows 2 and 3 do not need to be applied.

Table 8 Patch Availability for Oracle Database 12.1.0.2

Product Home	Patch	Advisory Number	Comments
11.1.1.7.0	See Section 3.3.18.7, "Oracle Fusion Middleware 11.1.1.7"	See Section 3.3.18.7, "Oracle Fusion Middleware 11.1.1.7"	
10.1.3.4.2	BP Patch 14625193	Released October 2012	See My Oracle Support Note 797057.1 , Overview of Available Update Patches for Oracle BI Publisher Enterprise 10g

3.3.7 Oracle Business Process Management

Follow the special instructions below to download Oracle Business Process Management patches.

1. Click Patches & Updates after logging into My Oracle Support.
2. Search for Oracle Business Process Management Suite.
3. Search for the required BPM release by clicking Select up to 10.
4. Select the patch with the build number that is indicated in [Table 53](#), or the patch with higher build number than what is indicated for the platform you are about to update, for example: EnterpriseJ2EE, Studio, or EnterpriseSA.
5. Download the patch.

[Table 52](#) describes the Error Correction information for Oracle Business Process Management.

Table 52 Error Correction information for Oracle Business Process Management

Patch Information	10.3.2	6.0.5	Comments
Final Patch	January 2017	July 2014	

[Table 53](#) describes the available patches for Oracle Business Process Management.

Table 53 Patch Availability for Oracle Business Process Management

Product Home	Patch	Advisory Number	Comments
BPM 10.3.2	100375	Released July 2010	See the instructions above on how to download the patch
BPM 6.0.5	100247	Released July 2010	See the instructions above on how to download the patch

3.3.8 Oracle Communications Converged Application Server

[Table 54](#) describes the Error Correction information for Oracle Communications Converged Application Server.

Oracle Exalogic	Patch	Advisory Number	Comments
2.x Physical	2.0.6.1.2 Physical Linux x86-64 (X4-2) PSU Patch 18630746 2.0.3.0.7 Physical Linux x86-64 (X3-2, X2-2) PSU Patch 18630746 2.0.6.1.2 Physical Solaris x86-64 (X4-2) PSU Patch 18630746 2.0.4.0.7 Physical Solaris x86-64 (X3-2, X2-2) PSU Patch 18630746	Released July 2014	See Note 1314535.1 , Announcing Exalogic PSUs (Patch Set Updates)

Oracle Exalogic	Patch	Advisory Number	Comments
2.x Virtual	2.0.6.1.2 Virtual (X4-2) PSU Patch 18630693 2.0.6.0.2 Virtual (X3-2, X2-2) PSU Patch 18630693	Released July 2014	See Note 1314535.1 , Announcing Exalogic PSUs (Patch Set Updates)
1.x	Exalogic Infrastructure 2.0.6.0.1 Virtual (X3-2, X2-2) PSU Patch 14834860	Released October 2012	See Note 1314535.1 , Announcing Exalogic PSUs (Patch Set Updates)

3.3.17 Oracle Forms and Reports 11g Release 2

For the appropriate product versions listed below, refer to the corresponding Oracle Fusion Middleware patch availability sections that contain information on Error Correction, and for the patches to apply. Not all homes that are listed in those sections might be present in the Oracle Forms and Reports 11g Release 2 installation. Only the relevant homes from those tables need to be patched.

[Table 73](#) describes the available patches for Oracle Forms and Reports 11g Release 2.

Table 73 Patch Availability for Oracle Forms and Reports 11g Release 2

Product Home	Patches	Comments
Oracle Forms and Reports 11.1.2.2 home	See Section 3.3.18.4, "Oracle Forms and Reports 11.1.2.2"	
Oracle Forms and Reports 11.1.2.1 home	See Section 3.3.18.5, "Oracle Forms and Reports 11.1.2.1"	

3.3.18 Oracle Fusion Middleware

For more information on how to identify the components in an Oracle home, see [Note 1591483.1](#), What is Installed in My Middleware or Oracle home?

This section contains the following:
